## **Chapter 1. Introduction**

1.1 Impact of thermoelectricity in science and technology	1
1.2 Crystal engineering and design	7
1.3 Recent advances in thermoelectric materials	11
1.4 State of the art of V-VI semiconductors	13
1.5 Status of $\text{Sb}_2\text{Te}_3$ compounds	16
1.6 Objectives	22

## **Chapter 2. Experimental techniques**

2.1 Introduction	24
2.2 Charge synthesis	24
2.3 Vapor deposition	26
2.4 Characterization tools	28
2.5 Imaging microscopy	28
2.5.1 Electron microscopy	30
2.5.2 Atomic force microscope	33
2.5.3 Energy dispersive analysis by X-rays	34
2.6 X-ray diffraction	35
2.7 Chemical etching	37

2.8	Microindentation studies	38
2.9	Electrical measurements	40
2.9.1	van der Pauw method	40
2.9.2	Hall effect measurements	41
2.10	Thermal analysis	43
2.10.1	Thermal diffusivity	43
2.10.2	Specific heat capacity	44
2.10.3	Seebeck coefficient measurements	44
2.11	Fourier transform infrared spectroscopy	46
2.12	Conclusions	47

### **Chapter 3. Studies on sulfur doping and figure of merit in vapor grown $\text{Sb}_2\text{Te}_3$ crystals**

3.1	Introduction	48
3.2	Growth of $\text{Sb}_2\text{Te}_{3-x}\text{S}_x$ crystals from vapor	49
3.3	Morphology, composition and structural analysis	55
3.4	Dependence of $S$ and $S^2\sigma$ on sulfur composition	70
3.5	Temperature dependence of electrical resistivity	73
3.6	Temperature dependence of Seebeck coefficient	75
3.7	Determination of figure of merit	76
3.8	Microhardness and defect studies	77
3.9	Conclusions	83

### **Chapter 4. Investigations on pure and indium doped $\text{Sb}_2\text{Te}_3$ crystals**

4.1	Introduction	85
4.2	Charge synthesis and deposition of crystals	86
4.3	X-ray diffraction and EDAX studies	89
4.4	AFM, SEM and TEM imaging	92

4.5	Temperature dependence of resistivity and Seebeck coefficient	100
4.6	Power factor and figure of merit	102
4.7	Microindentation analysis	105
4.8	Conclusions	107
<b>Chapter 5. Annealing and <math>^{60}\text{Co}</math> gamma irradiation effects on transport properties of <math>\text{Sb}_2\text{Te}_3</math> crystals</b>		
5.1	Introduction	108
5.2	Methods and materials	109
5.3	Effect of annealing on transport properties and power factor	119
5.4	Effect of gamma irradiation on transport properties and power factor	122
5.5	Conclusions	126
<b>Chapter 6. Energy gap determination of pure and doped <math>\text{Sb}_2\text{Te}_3</math> crystals</b>		
6.1	Introduction	127
6.2	Fourier transform infrared (FTIR) spectroscopic analysis	129
6.3	Energy gap measurements	134
6.4	Conclusions	140
<b>Chapter 7. Summary and scope</b>		
7.1	Summary and scope	141
<b>Bibliography</b>		145
<b>Publications &amp; Proceedings</b>		162
