LIST OF FIGURES

Figure 1.1 Evolution of Ubiquitous Computing ................................................. 4
Figure 1.2 Context lifecycle ................................................................................. 6
Figure 1.3 Layers in context deduction ................................................................. 7
Figure 1.4 Projected growth of connected devices ................................................. 9
Figure 1.5 Healthcare sector growth .................................................................. 10
Figure 1.6 Growth rate of Medical Device Market ............................................. 11
Figure 1.7 Architectural Style ............................................................................ 15

Figure 2.1 A Timed Automaton ......................................................................... 37
Figure 2.2 Components for Context determination ............................................ 42

Figure 3.1 Service automata for chk_weight service .......................................... 49
Figure 3.2 Service automata for alert_on service .............................................. 50
Figure 3.3 Automata for the composed service .................................................. 51
Figure 3.4 A Timed-Service automata representation ........................................ 54
Figure 3.5 UPPAAL tool verifying the automata for concurrency ................. 58

Figure 4.1 Framework Architecture for SHW .................................................. 66
Figure 4.2 Smart ward with six beds simulation ............................................... 67
Figure 4.3 UDDI Registration ........................................................................... 71
Figure 4.4 PHP code for Drain service implementation ................................... 75
Figure 4.5 PHP code for server implementation .............................................. 76
Figure 4.6 Extracts from the WSDL file ............................................................ 76

Figure 5.1 Bedside display ................................................................................... 85
Figure 5.2 Sequence Diagram for Context Aware Smart ward system ........... 87
Figure 5.3 JMeter Testing Screen ....................................................................... 88
Figure 5.4 Throughput plot *JMeter ................................................................. 89
Figure 5.5 Evaluation of ITU engine *JMeter .................................................... 91
Figure 5.6 Graph for Minimum, Average and Maximum time.................92
Figure 5.7 Chart Graph Visualizer *JMeter ........................................92
Figure 5.8 Chart for Spline Visualizer *JMeter .................................93
Figure 5.9 Chart depicting the Latency ................................................94
Figure 5.10 Chart illustrating the evaluation of ITU engine *JMeter .........97
Figure 5.11 Response Time Graph *JMeter...........................................98
Figure 5.12 Transaction per second *JMeter .........................................99
Figure 5.13 Composite graph of overall response time *JMeter ..........101
Figure 5.14 Active Threads over time *JMeter.....................................102
Figure 5.15 Average and Maximum data received in Kilo Bytes ..........103
